Stocks Breathe A Sigh Of Relief With Inflation Tracking As Expected

The Federal Reserve (Fed) began a new rate-cutting cycle with a 25-basis-point reduction on September 17, aiming to support the labor market, while balancing its dual mandate of keeping inflation in check.

That's why last week's Core PCE (Personal Consumption Expenditures) report carried particular weight with markets. PCE came in as expected at 2.9%, and both the stock and bond markets responded with a sigh of relief that it was not worse than expected. The Fed's inflation target is 2%, a level they don't expect to reach for several more years. In fact, Core PCE hasn't been at 2% since early 2021, nearly four years ago.

Core Personal Consumption Expenditures (PCE) Remains Elevated

Government Shutdowns Don't Have A Major Impact On Equities Historically

Risks are rising that we get at a temporary shut down in the government. This sounds terrible, but the country has been here many times before. Historically, there is really little to no impact on the stock market when a shutdown occurs. However, there have been times when the S&P 500 has reacted with a modest correction. Currently, with equity markets overbought and trading at an elevated 23x price-to-earnings ratio, we could enter the month of October with some volatility. We have been expecting a 5%-10% pullback. But keep in mind that October is the time of year we would expect good buying opportunities for the seasonal year-end rally.

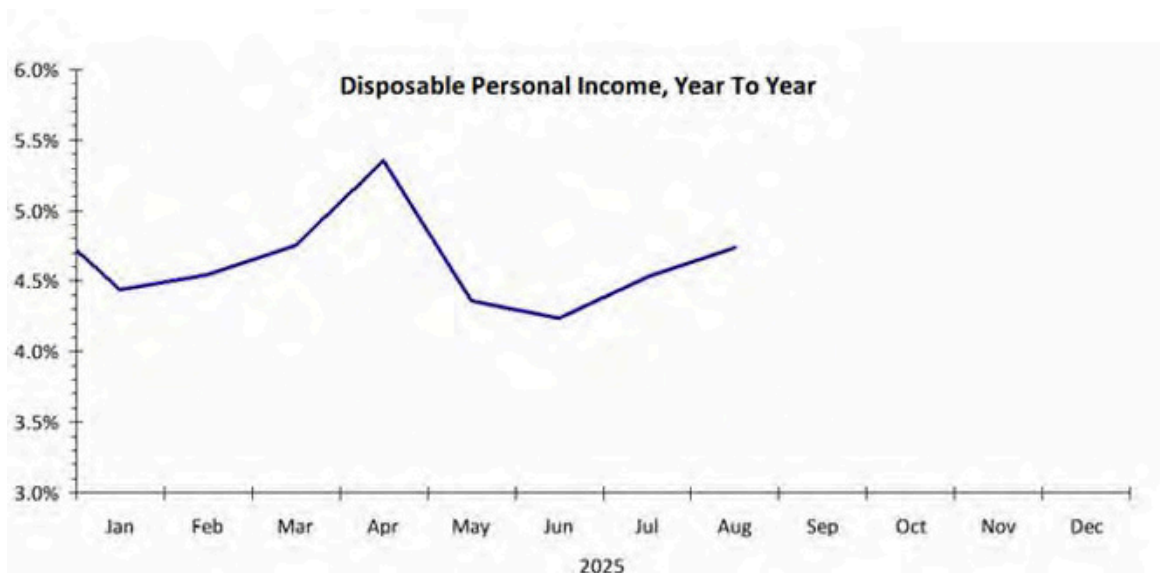

Historical Government Shutdowns And S&P 500 Performance

President	Start	End	Days	S&P 500		From Start to End	Performance from day shutdown started				Performance from day shutdown ended			
				Start	End		+4 Weeks	+13 Weeks	+26 Weeks	+52 Weeks	+4 Weeks	+13 Weeks	+26 Weeks	+52 Weeks

Consumers Maintain A Healthy Level Of Disposable Income

Personal income is a useful gauge of consumer health. Adjusting for taxes gives us disposable income, which is an even better measure. Currently, disposable income is growing at 4.7% and trending positive, which is another sign the economy should continue to grow.

2Q GDP Revised Upward From 3.3% to 3.8%

Last week we received the final revised data point for 2Q GDP with an uptick to 3.8% from 3.3% -- this represents a significant revision. The Atlanta GDPNow Tracker estimates 3Q GDP at 3.9%. But most economists have their economic forecasts significantly below this estimate.

New Major Breakouts: U.S. Banks, Japan, China

We are getting new all-time highs in small cap stocks, which we highlighted last week. The U.S. Banks are another area of the equity market recording highs. Their strong performance is another confirmation we are in a strong bull market.

Japan Continues To Hit Record Highs After 35-Year Secular Bear Market

One of our favorite markets outside the U.S. is Japan. Japan's equity market went nowhere for 35 years. Well, this has clearly changed with the Tokyo Stock Exchange Index continuing to march to new record highs. We believe Japan is in a new secular bull market that can be in place for 15-20 years.

Sector Readings: Communication Services Strongest, Health Care Still Weakest

Our sector model analyzes S&P 500 GICS sector classifications, using a weighted measure of price momentum across three time periods. We rank each sector from best to worst based upon the average of its 40-, 26-, and 13-week relative price performances. We rank each sector from 1-11 with 1 being the strongest and 11 the weakest.

Last week, Communication Services remained in the leading position for the 5th consecutive week, followed by Information Technology, also for the 5th week. Health Care remained in last place for the 21st consecutive week, since May 9, followed by Consumer Staples and Real Estate. Growth sectors continue to outperform Value sectors.

Sector Rankings By 40-, 26-, And 13-Week Average Relative Price Performance

	Sep 26	Sep 19	Sep 12	Sep 5	Aug 29	Aug 22	Aug 15	Aug 8
Consumer Discretionary	5	3	3	3	4	4	5	5
Consumer Staples	10	9	8	8	10	8	8	7
Energy	7	10	10	10	8	10	10	10
Financials	6	5	5	5	5	6	6	6
Health Care	11	11	11	11	11	11	11	11
Industrials	3	4	4	4	3	3	3	3
Information Technology	2	2	2	2	2	1	1	1
Materials	8	7	7	7	7	7	7	8
Communication Services	1	1	1	1	1	2	2	2
Utilities	4	6	6	6	6	5	4	4
Real Estate	9	8	9	9	9	9	9	9

OBOS List: Communication Services Overbought, Information Technology Near Overbought; Consumer Staples, Real Estate, Health Care, And Energy Oversold

Earnings growth remains strongest in Communication Services, which is near overbought. There are two outright oversold sectors, Consumer Staples and Health Care, while Industrials, Materials, and Real Estate are near oversold. The extreme overbought conditions that dominated in recent weeks are beginning to ease as market breadth improves, though some segments remain oversold.

Our tactical sector rotation model uses the S&P 500 GICS sector classifications. We apply a 13-week rate of change methodology that normalizes the rankings from overbought (OB) to oversold (OS). An industry group is overbought when it has risen too far too fast, relative to the rest of the market, based upon its normal movement. Conversely, it's oversold when it has lost too much too fast, relative to the rest of the market, based upon its normal movement. Over time, a sector tends to move back toward its normal rate of change, relative to the rest of the market.

Overbought sectors tend to slow their pace of gains in relative price, while oversold sectors tend to improve in relative price until they reach their average performance again.

Here's our methodology: the overbought-oversold table of sectors measures the 13-week rate of change in the relative price of each sector. We then average (i.e., smooth) this for 3 weeks and normalize the results. Normalized oscillator values over 1.0 are considered overbought, while those between 0.6 and 1.0 are considered near overbought. Normalized oscillator values below -1.0 are considered oversold, while those between -0.6 and -1.0 are considered near oversold.

Sector Overbought / Oversold List as of 26 September 2025

rank	S&P Sector	normalized Oscillator
1	Communication Services	0.8594 <i>Near Overbought</i>
2	Information Technology	0.5358 <i>Neutral</i>
3	Consumer Discretionary	0.1249
4	Energy	0.0350
5	Utilities	-0.0210
6	Financials	-0.5708 <i>Neutral</i>
7	Real Estate	-0.6788 <i>Near Oversold</i>
8	Materials	-0.8251
9	Industrials	-0.8718
10	Health Care	-1.0647 <i>Oversold</i>
11	Consumer Staples	-1.6283

Government Shutdown Looms

This week, everything rides on the government shutdown – and the jobs data (if we get to see it).

"Are we heading for a government shutdown?" That's the question on every investor's mind this week. Against the backdrop of a looming vote in Congress and if a budget deal is not reached, we may enter October with a government shutdown. We have had many shutdowns that have not disrupted the fundamentals of the economy or markets. A shutdown certainly can cause investors some angst, but it has been shown historically that eventually the government's budget will get funded. With equity markets overbought, we could get some volatility, in our view. If there's a shutdown, important economic reports may not be released. Which could be disruptive as this week is scheduled to be packed with data – most important of which would be the jobs data (JOLTS, ADP, U.S. Employment Report), given the Fed's new path of cutting rates. Weak labor data supports future rate cuts, whereas strong data may question whether we get another rate cut in October. So, buckle up, it could be a bumpy week.
